Founded in 2000, TotalBC, Inc. is a full-service technology company offering: Data network solutions & support, telephone systems, cloud servers/ desktops, Hosted VoIP (CallNet), IP Camera solutions, Access Control systems and cellular backup for business (StayOn).

Our Number One Priority Is Customer Service!

TotalBC offers the knowledge and experience that has earned the trust of over 4000+ business and industry clients nationwide. Its not just our tag line; Real Solutions - Real Service – Real Simple. It's our life! First, we listen to what our client needs are now and their future road map; there is no such thing as a cookie cutter or one size fits all solution at TotalBC.

YES, WE SPEAK "GEEK" BUT ONLY TO OTHER GEEKS

Whether you or an IT savvy professional that understands our world of acronyms and IT jargon or the business owner that just knows what he wants and wants it done. Our team will go over your needs and design the system or systems that is right for you and ensure that you know and understand it from A-Z.

WHAT'S THE GOAL OF MOST OF OUR CLIENTS?

Whether you are 5 employees or 250, the goal is the same from all of our clients; quality products, reliable solutions, and able to reach us if and when needed. Downtime, daily issues or non-responsive support company is not an option

IP CAMERAS/ ACCESS CONTROL

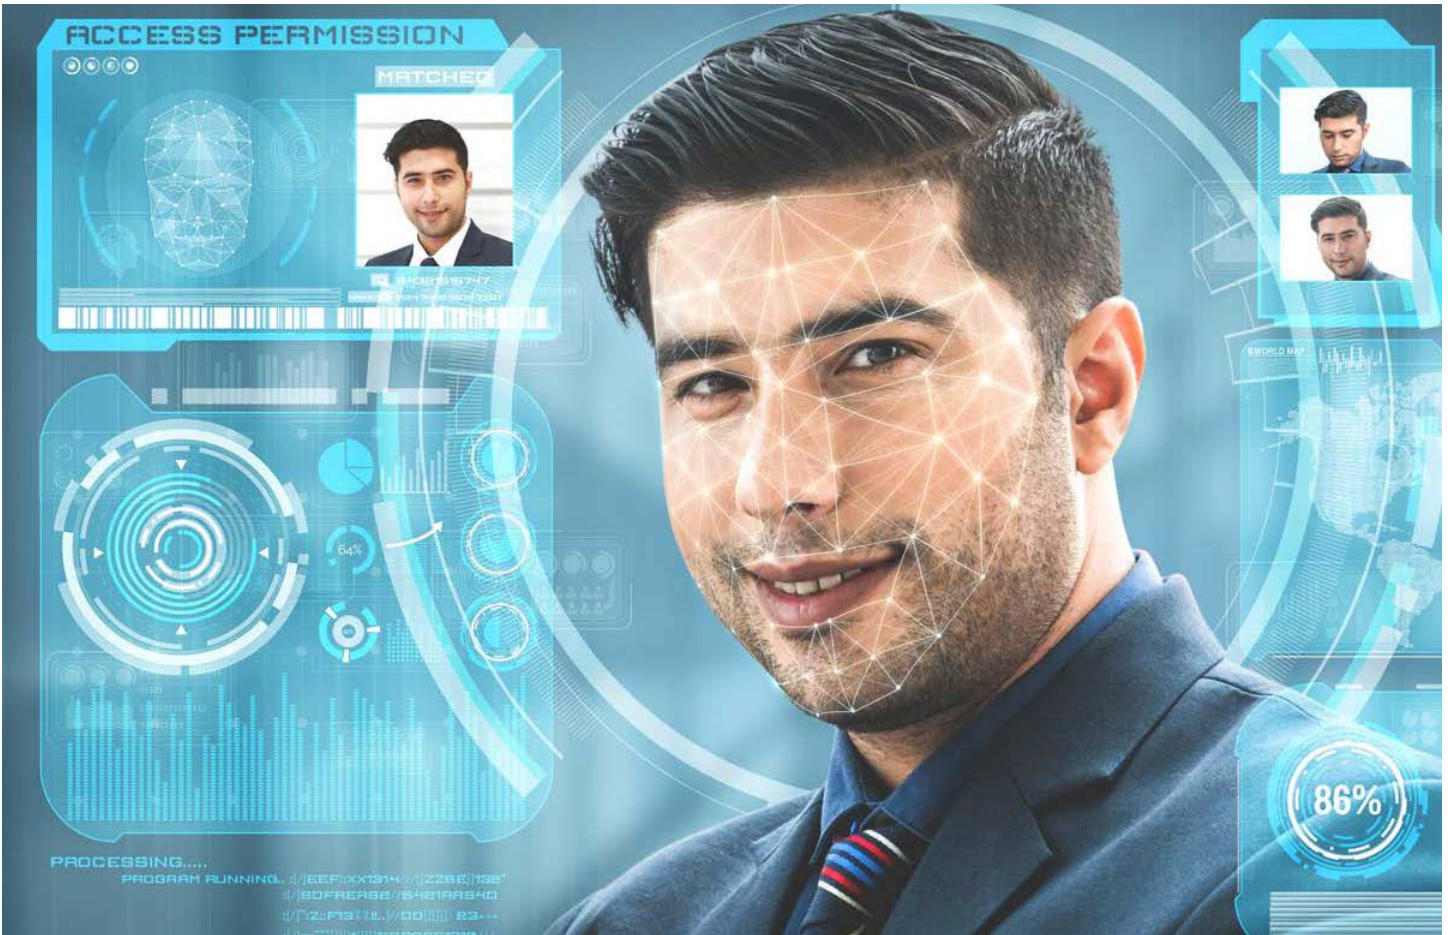

IP CAMERAS

Protect your business property, assets and employees with a solutions from simple to state of the art. With access to your facility through your mobile devices you can see what is happening at any moment. With "virtual fencing" designate an area that is off limits or if you need to know when perhaps a delivery truck has arrived, whether during normal hours or after hours. When someone enters that area, you will be notified and a picture will be taken and sent to you also.

Whether you need

- A Standard IP Camera solution
- Intelligent Video Audio Analytics with sound Classification
- Business Analytics
- AI Based Object Auto Tracking
- Audio Event Playback

TotalBC has the solution that you are looking for.

ACCESS CONTROL

An access control system from TotalBC will help you improve operational efficiencies, extend capabilities, and offer you peace of mind that valuable assets, resources and people are secured and protected.

With new and improved technologies emerging every week, deciding which system is best can be daunting. That is where our engineers strive, we will listen to your needs and then provide a solution that meets those needs along with all the information on options that will help you decide.

IT SERVICES

IT SERVICES

Our Network Service & Support solutions are available for businesses of any size and complexity both for traditional setups and cloud-based systems. TotalBC is the flexible solution to fit your IT needs.

If you're searching for a more responsive support company for your everyday needs and to get you back up and running faster in the event of a crisis, TotalBC is the clear choice.

MANAGED IT SERVICES

TotalBC offers efficient IT management, maintenance, and support on a monthly contract basis, using Scout, our remote monitoring and management technology.

As your IT Management company, we take on full responsibility for 24-hour monitoring, disaster recovery, as well as regular maintenance and troubleshooting for your entire IT system at an affordable fixed cost!

TELEPHONE SYSTEMS: OVERVIEW

TELEPHONE SYSTEM OR HOSTED VoIP

We are not advocating for technology just for technologies sake! There are many factors that lead our clients to decide to go with traditional onsite telephone systems over Hosted VoIP. Those could be an onsite software integration, broadband limitation, economics or just simply personal preference. TotalBC has been offering our clients on premise telephone systems from the top manufacturers since 2000.

Whether it's a one site location or 50 sites, our engineers can design a solution with the advanced features you require.

HOSTED VoIP: CallNet

HOSTED VoIP

CallNet accommodates the new entrepreneur all the way up to the fortune 50 companies of the world without additional capital expenditures.

Being from the telecom industry, we know what clients really want and need from their telecommunications system. The lower cost and features offered by VoIP can make a positive impact not only to your bottom line but also to your customer's experience with your company. With all the features that allow our clients to be productive such as Video Conferencing, file sharing, CRM integration, desktop and mobile apps. Video conferencing and collaboration is the perfect solution for moving business forward while cutting back on costs. Facial expressions, gestures, eye contact, they all make communications far more personal and ultimately, more productive. Video calling, screen sharing, file transfers, etc. significantly increases the quality of communications. With VMeeting, it's easy to get started, and so simple to use. As you'll see, there is nothing quite as compelling as being able to see the people who matter to your business.

BACKUP SOLUTION:

STAYON AS A BACKUP SOLUTION!

When your wired internet connectivity experiences a service disruption (some of our clients experience these multiple times a month) your business is exposed to risks of loss revenue, productivity and customer frustrations and complaints! The irritation is doubled when your phones rely on your internet connection, now you have no way to send/receive emails or telephone calls.

StayOn is the Solution! StayOn will automatically provide the non-stop connectivity access you need in to conduct business efficiently and cost effectively when your primary internet connection goes down. No equipment to purchase, just choose which plan fits your estimated need for backup plans start at about \$2 a day!

STAYON AS YOUR TEMPORARY OR PERMANENT SOLUTION!

Big or small needs, our solution is used by first responders (Fire-Medic-Police), movie locations, Grand openings, retail locations, as a temporary solution until internet arrives from the carrier, convenient stores or just for the business that is in a location that cannot get good quality internet and where dial up and DSL just won't cut it!
