

The Next Generation in PC's

Introducing the 1K, the all in one Keyboard PC

This new generation All-in-One PC in a keyboard not only takes up far less desktop space, but also puts an Intel® Core™ 2 Quad CPU with all its features and performance at your fingertips. The new all-in-one keyboard is a true innovation packing so much power, performance and compatibility inside a normal size keyboard. With features such as Dual Display capabilities, 4GB of DDR2/667MHz RAM, 1 GB LAN and DVI interface you now have a complete personal computer that takes up no more space than a typical keyboard. Simply place it on your desktop, plug in a monitor and you are done!
